

Meet the Inventor

Rebecca Gomez
Inventor of Anuleaf AD

Why did I invent Anuleaf AD? In a word, frustration.

Traditional medications and treatments didn't provide the relief I needed for my hemorrhoid inflammation -- so I invented Anuleaf AD. As soon I began using it, I found that it not only relieved my pain immediately, but also helped me heal faster.

Now, I have to decided to share my success with other hemorrhoid sufferers who are active like me – and who don't want to waste any more time and money on treatments that are ineffective.
